PROFESSIONAL SUMMARY

Full-Stack JavaScript Developer with 7+ years of professional and freelance experience building and scaling SaaS products and web applications for 20+ clients across the UK, US and Europe. Specialist in React, Next.js, Node.js and TypeScript, with end-to-end ownership of system architecture, multi-tenant data isolation, authentication and RBAC, CI/CD pipelines and automated testing. Delivered 45% faster CI builds, 28% smaller frontend bundles, 25-30% lower API latency and 25% fewer post-release defects. Experienced in distributed agile teams and in shipping AI/LLM features to production.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, C++, Python

Frontend: React.js, Next.js (App Router), Redux, Zustand, Tailwind CSS, shadcn/ui, Responsive and Mobile-First Design, Web Accessibility

Backend: Node.js, Express.js, REST APIs, GraphQL, WebRTC, Microservices, Server-Side Rendering (SSR), Server-Side Caching

Databases: MongoDB, PostgreSQL, Supabase, Firebase, Convex

Auth and Security: JWT, OAuth, Clerk, Role-Based Access Control (RBAC), Multi-Tenant Architecture, Secure Session Management

AI and Integrations: OpenAI API, Google Gemini, Vapi AI (TTS/STT), Google Speech API, Stripe, Google Maps API

Testing and DevOps: Jest, Playwright, Unit Testing, End-to-End Testing, Git, GitHub Actions, CI/CD, Deployment Pipelines

Tools and Practices: Agile, Scrum, Code Review, Technical Documentation, Mentoring, Figma, Postman, Chrome DevTools

PROFESSIONAL EXPERIENCE

Founder & Lead Engineer | North Foundry | Remote

Jul 2026 - Present

- Lead end-to-end technical delivery of client web and SaaS platforms using Next.js, React, TypeScript and Node.js, owning system design, architecture standards and deployment workflows.
- Design scalable application architectures and AI-powered automation workflows, including CRM and business-process integrations.
- Integrate third-party APIs, authentication, cloud services and payment gateways; run code reviews and enforce engineering standards across projects.

Full-Stack Engineer | Webflow X | Remote

Oct 2025 - Jun 2026

- Architected a multi-tenant AI SaaS productivity platform from scratch using Next.js, TypeScript and Convex, owning system design through production deployment.
- Built real-time team chat and video calling with Convex live queries and WebRTC, enabling low-latency collaboration for distributed teams.
- Integrated OpenAI, Google Gemini and Google Speech API for AI meeting summaries, documentation assistance and speech processing.
- Designed and enforced organization-level RBAC and multi-tenant data isolation.

Full-Stack Engineer | Nexora Systems | Remote, Greater London, UK

Jul 2024 - Oct 2025

- Cut CI build times by 45% by re-architecting Next.js and Node.js microservices and streamlining deployment pipelines.
- Reduced API latency by 25-30% through a GraphQL implementation with server-side caching strategies.
- Shipped a shared UI component library (shadcn/ui + Tailwind CSS) across 8+ platform modules, cutting feature development time by ~20%.
- Established automated end-to-end test coverage with Playwright and Jest across critical user flows, reducing post-release defects by 25%.

Full-Stack Engineer | InvoiceStock | Remote, Wolverhampton, UK

Jul 2022 - Jun 2024

- Reduced frontend bundle size by 28% by migrating the codebase to Next.js, TypeScript and Zustand.
- Architected multi-tenant data isolation and RBAC supporting secure, scalable SaaS operations for 50+ SMB customers.
- Built invoicing workflows with barcode scanning, PDF generation and email automation, reducing manual processing for clients by 40%.

Senior Frontend Developer | Routelane | Remote, Missouri, USA

Mar 2021 - Jun 2022

- Built real-time driver and load tracking with Firebase and the Google Maps API, enabling live operational visibility for dispatchers.
- Developed mobile-first React dashboards and integrated TypeScript REST API endpoints, improving dispatch efficiency by 20-25%.

Freelance Web Developer | Upwork | Remote

Jun 2019 - Feb 2021

- Shipped 15+ responsive, SEO-optimized websites and web applications for startups and SMBs, managing scoping, client communication and delivery independently.

PROJECTS

Converso - AI-Powered Learning Platform

- Full-stack AI education platform (Next.js, Supabase/PostgreSQL, Clerk, Vapi AI) where students create AI voice tutors and learn through spoken conversation.
- Implemented real-time TTS/STT via the Vapi SDK, subscription billing and RBAC with Clerk and Stripe, and Sentry error monitoring.

Resumind - AI Resume Analysis Tool

- AI tool scoring resumes against a job description for ATS compatibility and missing keywords; built PDF parsing and strict-JSON model output on React Router 7 and Puter.js.

Subme - Tiered Creator Subscription Platform

- Built a three-tier membership system with Stripe subscriptions, RBAC content gating and live earnings tracking, serving 500+ paying users.

EDUCATION

The University of Lahore | BSc Computer Science

Oct 2022 - Jun 2026

British Council | A Levels: Mathematics, Computer Science, Physics

Aug 2018 - Aug 2021

Laurels Public School | O Levels: Mathematics, Physics, Chemistry, Computer Science

Mar 2016 - Aug 2018

CERTIFICATIONS

Google / Coursera: AI Fundamentals, AI for App Building | Mar 2026

HackerRank: JavaScript Specialist, Problem Solving Intermediate | Jul 2023

LinkedIn Learning: React: Software Architecture | Sep 2022
